2021

Bachmann is proud to welcome the Large Scale Dash 9 to our *Big Haulers*® lineup for 2021. The Dash 9 was given its memorable moniker by General Electric upon its release in 1993. Simple and reliable, the model proved immensely popular within the United States. Fully featured and including an advanced nonproprietary plug-and-play electronic printed circuit board, it is ready to get to work on your Large Scale freight line.

This year, we're introducing three HO scale, ready-to-run train sets that will appeal to a wide range of modelers. The *Track King*, *Denali Express*, and Norman *Rockwell Freedom Train* feature everything needed for model railroading in one complete package: locomotive, cars, track, power pack, and speed controller. Beginners and advanced modelers alike will find something they love in every Bachmann train set.

The face of ruggedness and reliability is making a return to our selection of HO motive power. The K4 4-6-2 steam locomotive includes a TCS WOWSound® CD-quality 16-bit 44,100 Hz decoder with Audio Assist® for easy programming without CVs. A variety of new Sound Value on Board® locomotives are also joining our HO line, including the 0-6-0 with Roadname-Specific Tenders, a 2-6-0, FT Diesel, GP35, RS-3, and 44-Ton Switcher. Each includes a TCS decoder programmed with authentic sounds and is ready-to-run on both analog and DCC layouts. These arrive alongside a variety of new HO scale rolling stock, including the Outside-Braced, Sliding-Door Box Car; the Center-Beam Flatcar with Bulkheads; the Off-Set Cupola Caboose; and more.

In N scale, the 4-6-4 Hudson has joined our lineup and is a perfect addition to your steam roster. The Hudson arrives factory-set for maximum realism and is equipped with an *Econami*™ *SoundTraxx*® steam package. Diesel locomotive enthusiasts will be excited for the arrival of the DCC Sound Value-equipped GP38-2. These will go great with our new selection of rolling stock, including the Bethlehem Steel 100-Ton, Three-Bay Hopper and the Hi-Cube Box Car. Our N Scale *Thomas & Friends*™ lineup also continues to grow! James the Red Engine and Toby the Tram Engine, along with S.C. Ruffey, join our lineup and will help bring your own Island of Sodor to life.

We're happy to celebrate the East Broad Top Railroad's return to service in 2021 with our new items in On30 scale. The *East Broad Top – Freight* set comes complete with a 2-6-0 locomotive, tank car, two-bay steel hopper, and caboose. See the On30 section for complete details. Add the new low-side gondola to this set to create your own narrow-gauge freight line that harkens back to the EBT's heyday.

Large Scale railroaders are sure to love our new *Cowcatcher* train set. Watch as four cow heads peek back and forth through stock car windows as the train navigates the track. This set comes complete with a Baldwin 4-6-0 steam locomotive and tender, animated stock car with cattle, and bobber caboose. Check out page 230 for more details.

Lastly, Williams by Bachmann welcomes the whimsical "Eggliner" in 2021. Offered in a variety of holiday themes, this colorful motive power is the perfect way to celebrate the seasons on your O gauge railroad.

With an ever-increasing selection of sets, locomotives, rolling stock, scenery, and accessories, Bachmann offers loads of options for beginners, advanced modelers, and everyone in between in 2021.

Norman Rockwell Freedom Train NEW

an E-Z Track® set with E-Z Mate® couplers

Item No. 00767 • Suggested price: $359.00

Norman Rockwell™
Courtesy of the Norman Rockwell Family Agency

Bachmann is proud to honor one of America's most beloved artists, Norman Rockwell, with the *Norman Rockwell Freedom Train*. In 1941, U.S. President Franklin D. Roosevelt addressed Congress with his hopes for America after World War II, emphasizing a vision of four basic freedoms: freedom of speech, freedom of worship, freedom from want, and freedom from fear. Rockwell painted each of these freedoms as part of his desire to do more for the war effort, naming the series the *Four Freedoms*. This artwork would help elevate Rockwell to an icon of American culture after being printed in *The Saturday Evening Post*. In May of 1943, Rockwell joined a combined campaign by the *Post* and U.S. Department of the Treasury to sell war bonds and stamps through a travelling rail exhibit. *The Freedom Train*, adorned in a patriotic red, white, and blue paint scheme, rode the rails from September of 1947 to January of 1949 to 16 U.S. cities highlighting American heritage and the importance of preserving important American documents. 133 items in total were featured on the train, including Rockwell's *Four Freedoms* and original versions of the United States Constitution and Declaration of Independence. Every citizen who bought war bonds through the campaign received printed copies of the *Four Freedoms* in return. The classic artwork's next stop is your HO scale layout, where Bachmann's *Norman Rockwell Freedom Train* embodies the same hopeful message of its namesake.

380-TON SCHNABEL CAR with RETORT/CYLINDER LOAD
(North American style)
32.5" long; performs best on 22" radius curves or greater.

Suggested price: $349.00 each

The Schnabel car's unique design allows it to carry extremely heavy or oversized loads, such as generators and transformers for power stations, by making the load an element of the car. The two tapered lifting arms that hold the load resemble a bird's beak, which gave the car its name—*Schnabel* is from the German for "carrying-beak-wagon" (*Tragschnabelwagen*). Schnabel is a funny name for a seriously powerful freight car.

Features include:
- 16 sets of 125-ton roller-bearing trucks
- prototypically correct 36" metal wheels
- RP25 wheel contours
- 8 span bolsters
- detailed retort/cylinder load
- molded hydraulic lines and pumps

BACHMANN E-Z MATE® COUPLERS FOR THE 21ST CENTURY

Magnetically Operated Knuckle Couplers

E-Z Mate® couplers make use of precision molding techniques to allow the molding of springs as an integral part of the knuckle coupler; *E-Z Mate*® Mark II couplers include an integrated metal coil spring. *E-Z Mate*® and *E-Z Mate*® Mark II couplers eliminate the problems and expense associated with separate coil springs.

To install *E-Z Mate*® and *E-Z Mate*® Mark II couplers, just remove the coupler pocket cover, drop in the coupler, and replace the cover. Operation is simple as well; *E-Z Mate*® and *E-Z Mate*® Mark II couplers operate with a standard metal "glad hand" and under-track magnet, and they are completely compatible with all magnetically operated knuckle couplers currently on the market. (Our under-track magnet comes with a trackside brakeman figure to indicate the magnet's position.) Coupling, uncoupling, and other yard operations are all performed with ease.

East Broad Top - Freight

an E-Z Track® set with E-Z Mate® couplers

Item No. 25025 • Price to be announced

NEW

Spectrum

The East Broad Top Railroad and Coal Company began operation in 1872 to mine and transport coal from the Broad Top Mountain in central Pennsylvania. When the mines closed in 1956, the railroad was purchased by a company which operated a small section of the line for tourist excursions. The EBT railroad held the distinction of the only original narrow-gauge railroad surviving east of the Rocky Mountains for much of its history until the railroad ceased operations in 2011. Steam locomotives will once again head down the tracks in 2021 as the railroad returns to service with passenger excursions. Bachmann is happy to celebrate the history and revival of the East Broad Top with this freight train set. The set arrives complete with a 2-6-0 locomotive with operating headlight and tender with coal load, tank car, two-bay steel hopper, and caboose. Also included is a 56" x 38" oval of snap-fit nickel silver *E-Z Track®*, magnetically operated *E-Z Mate®* couplers on all cars, power pack and speed controller, and illustrated instruction manual.

2-6-2T BALDWIN CLASS 10 TRENCH STEAM ENGINE (*DCC WOWSOUND®-EQUIPPED*)
FEATURING CHUFFINITY™ TECHNOLOGY
Performs best on 18" radius curves or greater.

Suggested price: $459.00 each

Quickly created narrow gauge railroads played a crucial role in bringing food, ammunition, and construction material to entrenched troops and carrying away injured soldiers from the Western Front in World War I. The Baldwin Class 10 Trench 2-6-2T was one of the locomotives that saw service with the U.S. Army in France. When the war ended, the victorious U.S. troops turned over all the railways and equipment to the French, who adapted them for agricultural use. Bachmann's DCC WOWSound®-equipped model is the first ever to feature Chuffinity™ technology. With a ten-fold increase in the number of chuff sounds over previous WOWSteam offerings, Chuffinity™ creates amazingly diverse and realistic sounds. Coupled with intelligent load and grade sensing, chuffs will vary in character, volume, and intensity in prototypical fashion. Chuffinity™ is just part of this Trench engine-specific WOWSound® steam locomotive sound package that also features depot background and battleground sounds. This DCC sound-equipped Trench engine will put you in the middle of all the action of the Great War!

O SCALE *PLASTICVILLE® U.S.A.* KITS

Since 1947, hobbyists and collectors have made *Plasticville® U.S.A.* products their structures of choice. *Plasticville®* pieces add character and dimension to your O scale layout. Many buildings and accessories have been added to the *Plasticville®* line throughout its history, and many are still produced from their original molds. As a fun challenge to collectors, you can collect hundreds of product, color, and packaging variations that have occurred over the years (you can even join the independent Plasticville Collectors Association at plasticvilleusa.org). Whether you're new in town or an established civic leader, Bachmann builds *Plasticville® U.S.A.* for you. City growth is limited only by your imagination!

Ringling Bros. and Barnum & Bailey™

Imagine living in a rural town in the early 1900s and seeing a circus train arrive at your railroad station. A powerful steam engine would be pulling car after colorful car, some filled with exotic animals you'd never seen, such as lions, tigers, and elephants! While many circuses were able to expand because of the efficiency of rail transportation, it was only the merger of Ringling Brothers and Barnum & Bailey in 1919 that created a colossal train of over 90 cars! For nearly 100 years *The Greatest Show on Earth*™ traveled by rail to thrill millions of circus-goers all across the country. Bachmann is delighted to bring you these vintage *Ringling Bros. and Barnum & Bailey*™ models that let you experience all the excitement of the *Ringling Bros.*® train coming to town!
